Plan, Do, Check, Act

Managing for Health & Safety HS(G)65 Best Practice for H&S Management systems

The 'Plan-Do-Check-Act' method adopted for the Jersey public service H&S management system is from the Health and Safety Executive.

It focuses on how to achieve a balance between the systems and the behavioural aspects of a H&S management system.

It treats H&S management as an integral part of good management practice, rather than as 'standalone'.

It has been widely used and is considered to be H&S best practice.
